

Tamper Resistant Nuts

Break-Away Nuts should be used when removal is not intended. After tightening to the proper torque the hex heads breaks away, leaving a conical shaped tamper resistant nut that secures the fixture.

BREAK-AWAY NUTS Zamak 5 Zinc Alloy. Available upon request in a painted or powder-coated finish!

TRIDENT NUTS Zamak 5 Zinc Alloy. Available upon request in a painted or powder-coated finish!

Trident®Nuts are the choice for providing secure fastening where serviceability and removable fastening is required. The Trident ®Nut features a conical design that prevents unauthorized removal, and has three indented slots which allow installation and removal with proper tooling.
