

Makita 6935FDWDE

14.4V Impact Driver Kit

[Click to Buy](#)

Light up your work surface with a high output LED light that will illuminate the work surface for increased visibility. This powerful, yet efficient tool, is both durable and compact. The impact resistant magnesium alloy gear case provides the durability and with a length of only 6-3/8" it has the most compact design in its class. This impact driver has true variable speed for a smooth increase in speed and complete control to match all applications. Convenient features include a phosphorescent rubber bumper to locate the tool in low light work areas and externally accessible brushes for greater serviceability.
