

Makita BDT140

18VDC Impact Driver Kit

[Click to Buy](#)

Makita's new LXT cordless tools have been designed specifically for Lithium-Ion technology and redefine "cordless" by delivering 18V power in the weight of a 12V tool. "Tools of the Trade" magazine awarded their 2006 Editor's Choice Grand Award to this innovative new category of cordless tools.

- More Power- Makita built, 4 pole maximum torque motor delivers

more efficient power in a compact size.

- Less Weight/Better Fit- small, easy to hold and work in tight places.

- More Work- The LXT batteries and optimum charging system produce 280% more lifetime work and 2x more battery cycles than traditional Ni-Cd batteries.

- Built-in LED light for more illuminated work.

- Safety- Electric brake for immediate stops and minimal kickbacks.

- Ideal tool for installing self-drilling screws, much better than standard drill drivers.

Specifications

- Capacity 1/4" Hex Shank

- No Load RPM 0-2300 RPM
